

Make a mask for your favourite toy

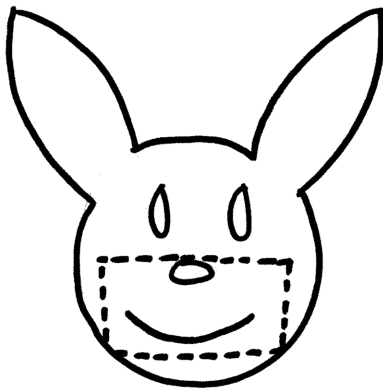

1. Choose your favourite toy.

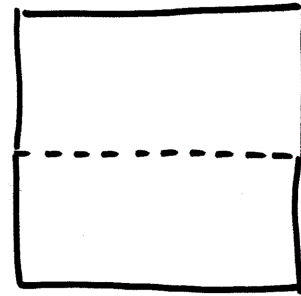

2. Measure the circumference of its head.

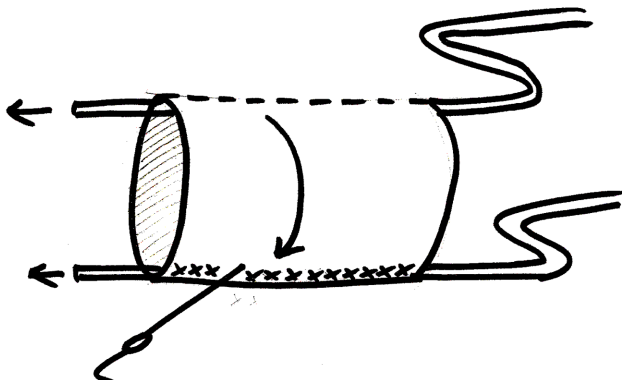

3. Cut two strings of that length, adding a few extra inches.

4. Measure a rectangle that covers your toy's nose, mouth and cheeks.

5. Cut a piece of cloth (try to recycle!) that is twice the size of that rectangle (it will look like a square!)

6. Fold the square and stitch the longest side of your folded square (now a two-layered rectangle).

7. Pass the two strings through the tube you've created and balance their length on both sides.

8. Secure the strings by stitching them (optional).

8. Put the mask on your toy and don't forget to put your own mask on.

9. Go outside and play!
